

This is where you ensure installation safety as a Service technician for control systems (m/f/d)

 **Rheineck, Switzerland**

 **80-100%**

STEBATEC Züllig AG is a pioneering company in the water and wastewater market with many public sector clients. Our team develops innovative automation solutions for water supply, road drainage and small hydroelectric power plants. We are also a leader in the measurement and control of municipal drinking water and industrial wastewater.

Your tasks

- Maintenance, troubleshooting and programming/configuration of control systems
- Monitoring and adjustment of logging, data transmission, server environment and network technology of customer systems
- You will make suggestions for standardisation options
- As an automation engineer, you will work closely with assembly, project management, development, sales and external partners

What you can expect

In a collegial, flexible team with short communication channels, you will work independently and with state-of-the-art tools. You will take on responsibility, acquire skills, help to further expand our market position and have the opportunity for personal development.

Your profile

- Basic knowledge of server and network technology
- Experience in creating system visualisations is an advantage
- Very good written and spoken German, other foreign languages are an advantage
- Competent and customer-oriented manner
- Strong communication skills, assertiveness, sense of duty and responsibility, flexibility and ability to work in a team
- Category B driving licence
- Willingness to work on-call
